Vodavi IP Endpoints

For Telenium[IP] and XTS-IP Systems

VODAVI

Choose the right tools to get the job done. Vodavi offers a full range of IP solutions to help your Telenium^{IP} or XTS-IP telephone system improve your business. Whether you would like to upgrade the current telephones on your system or add software that will streamline your communications, Vodavi has the IP solution you're looking for.

8-Button Display – IP7008D

This 8-button telephone is the perfect upgrade for your XTS-IP or XTSc-IP telephone system. All IP7000 phones feature a built-in 10/100 switch, message wait indicator, silence suppression, echo cancellation and DHCP for automatic IP address assignment, making it easy to relocate a phone. The IP7000 Series also features remote Web-based upgrade, management and configuration. This phone offers selectable ring tones and text messaging on the Telenium^{IP} platform. The IP7008D has a sleek blue backlit LCD display (2x24), full duplex speaker, 8 Flex buttons, a 2nd LAN port for a shared PC connection to the LAN, optional PoE 802.3af, and 2.5mm headset jack.

24-Button Display – IP7024D

The IP7024D has all the same features as the IP7008D plus 3 soft keys, a 3x24 backlit LCD display, and 24 Flex buttons. The IP7024D also supports a navigation key for access to the dial-by-name directory and softkey scrolling. On the Telenium^{IP}, a menu function is included.

24-Button Large Display – IP7024LD

Just when you thought a phone couldn't get any better. The IP7024LD telephone, is exclusive to the Telenium^{IP} telephone system. It features everything the IP7024LD and ALSO includes a larger display (9x32). This premium executive phone also includes a scheduler and phone book.

EZ Attendant

EZ Attendant is the perfect addition to support your attendant or answering position on the Telenium^{IP} system. Manage incoming calls with the click of a mouse, and much more.
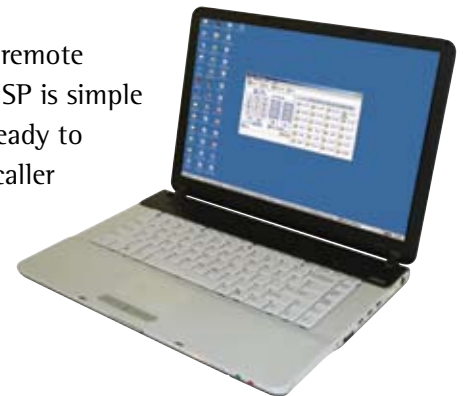

ez ATTENDANT

Nomad IP

The Nomad IP WiFi® handset may be small, but it thinks it's like its big desktop brothers. With the Nomad IP, a remote employee can travel around the building or even away from the office and, using a broadband connection, make outbound calls, receive inbound calls and voice messages as if they never left the office in the first place.

Nomad SP

The Nomad SP is a soft phone designed with the road warrior in mind. Nomad SP is a remote extension of the telephone system that resides on a desktop or laptop PC. The Nomad SP is simple to operate, simply connect a USB headset with a broadband connection and you'll be ready to work. Nomad SP includes a Phone Book database that provides pop-ups for incoming caller identification and allows the user to place calls as well as manage contact records. The Nomad SP also includes a Short Message Service (SMS) (Telenium^{IP} only) that allows the user to send messages to other Telenium^{IP} users.

Nomad PDA

Personal Digital Assistants are not new, but the Nomad PDA is. The Nomad PDA provides Telenium^{IP} users with the benefits of having a system phone extension on your PDA. Nomad PDA gives you the convenience of mobility and more at your fingertips. Requires Windows Mobile Edition® and wireless Ethernet or WiFi® connection.

Nomad VP with Video

Does the idea of video conferencing sound appealing? The Nomad VP is a Video Phone Solution for Telenium^{IP} that works with your PC and web camera. With the Nomad VP you can not only video conference with an associate, but you can share PC applications with them as well! Not only will the Nomad VP save on travel expenses, but it's also a great training tool.

Nomad RSGM

Nomad RSGM is a gateway used for extending Telenium IP or XTS-IP services to a home office/remote office worker. It supports one Vodavi IP phone of your choice, one SLT phone or fax, and a local analog CO port. By using a local CO port the Nomad RSGM allows for emergency dialing in the event of a network or power failure. The Nomad RSGM also features remote, Web-based administration.
